

# Planet Profit Aldi Royalty Scheme

Andrey Pricop  
Marco Marsella  
Kiran Joseph  
Jake George

# Introduction

**✗ ALDI**

Aldi does not offer a rewards scheme in Ireland that keeps customers coming back. There is no extra discounts or rewards if you keep coming back to Aldi which might give customers a chance to buy more items

**✓ LIDL**

Lidl has a mobile app which offers discounts to people who use it and charges people who don't use it more. They give special discounts based off your shopping incentivizing you to buy more products. They offer free pastries to reward customers for shopping in Lidl

# The Opportunity

01

## The Problem

Aldi has no loyalty scheme meaning its competitors like Lidl have an advantage.

## Our IS Solution

A mobile app that rewards customer loyalty with discounts, free items and sales.

02

03

## The Benefits

Increased customer loyalty, bigger profits, and business intelligence from first-party data.

# Its Competitors

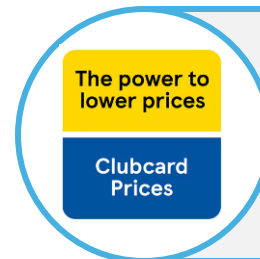

## Lidl

Considered its main competitor. Give personalised deals for shoppers. Free items to encourage customers to come back. Rewards customers who use the app.

## Dunnes

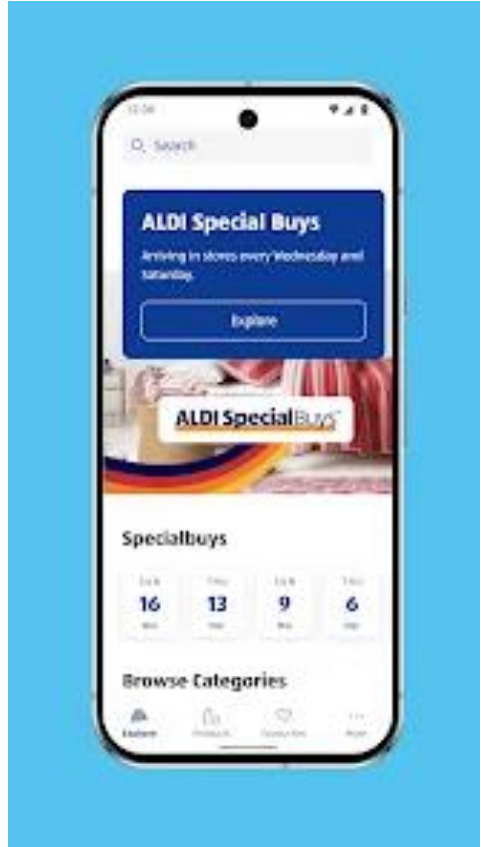

Offer vouchers to customers. This gives them a goal to reach every time they shop encouraging impulse buys and profit.  
Spend €50, Get €10 Off Your Next Shop  
Spend €100, Get €20 Off Your Next Shop

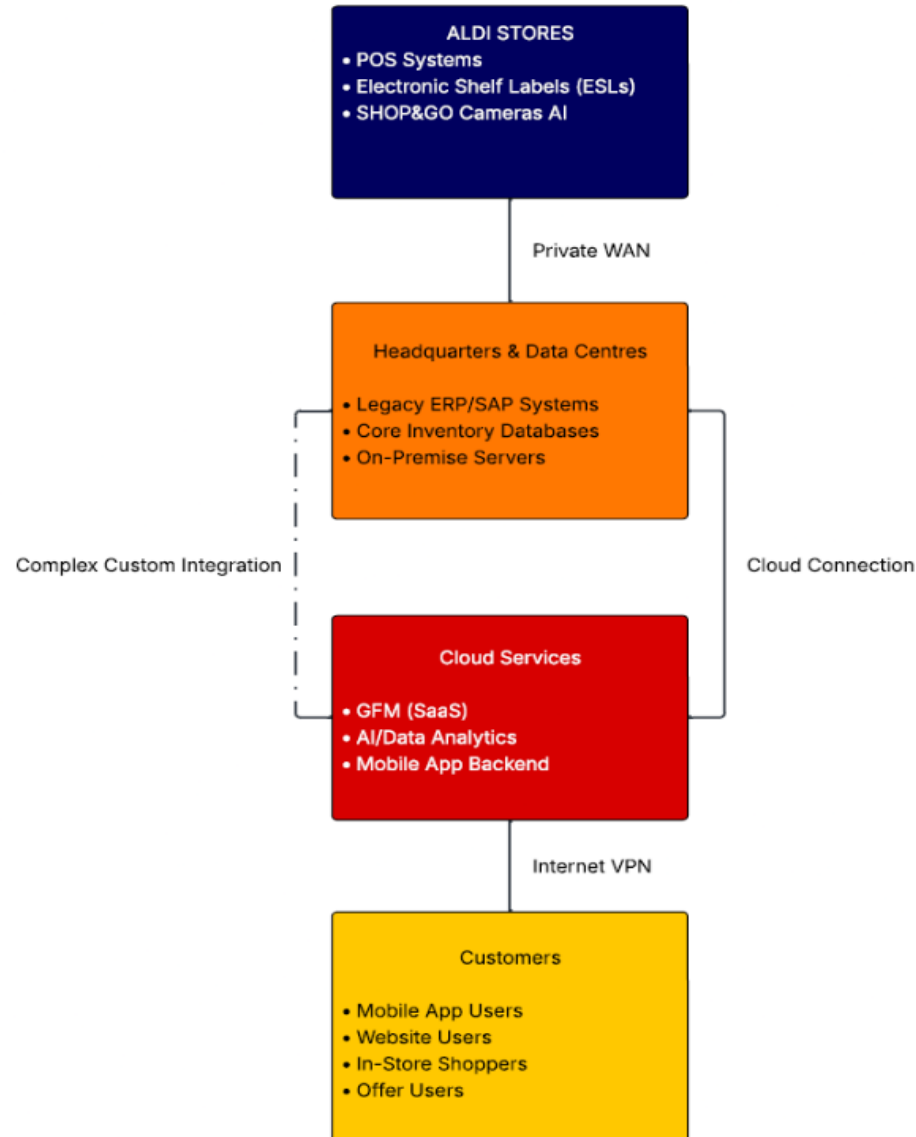

## Tesco

Rewards customers who use it, profits off those who don't. Points which can be converted to use on other things. Encourages people to come back and spend more money.

# Our IS Solution

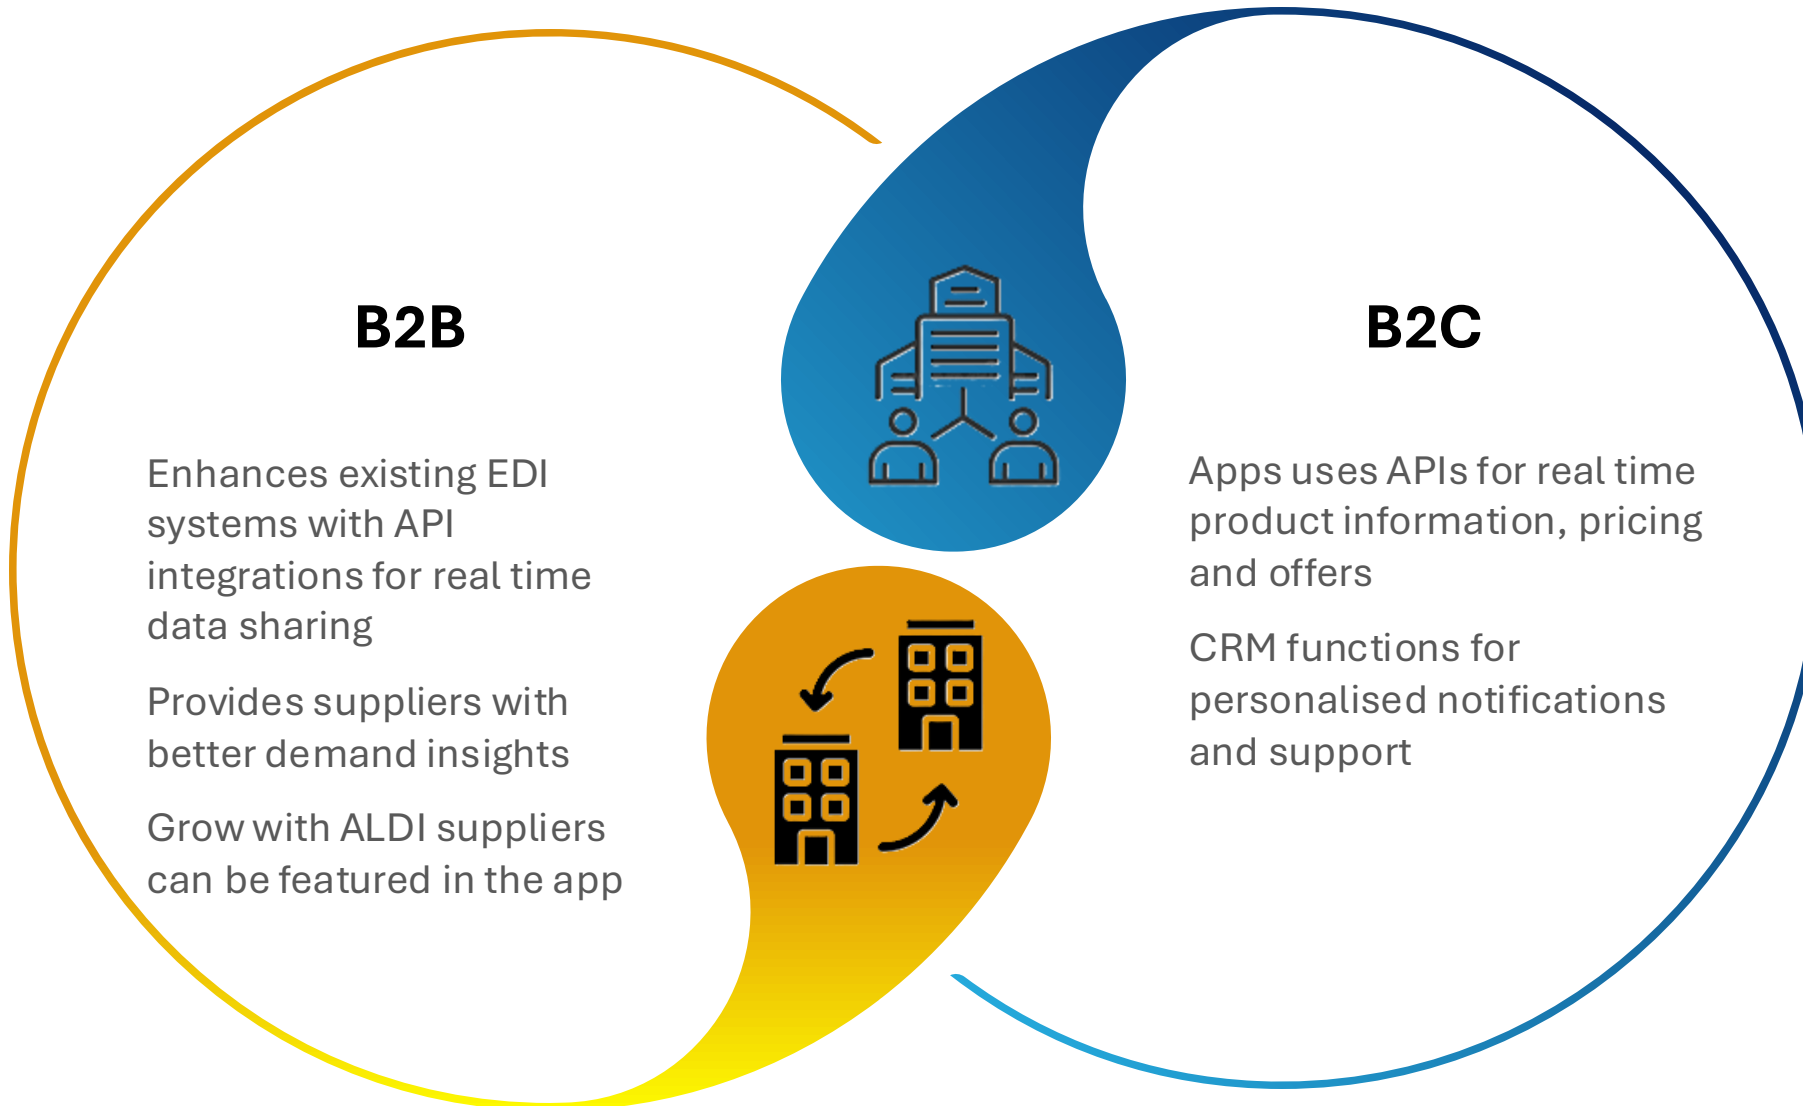

# Infrastructure Analysis

- **Hybrid System:** Mix of Old and New Tech
- **Main Gap:** Fragile Integration between Data and Cloud layers
- **Business Impact:** Slows innovation and creates security risks.
- **Root Cause:** Legacy Systems were not built for cloud.

# B2B and B2C

# Business Intelligence and KPIs

## CURRENT LIMITATION

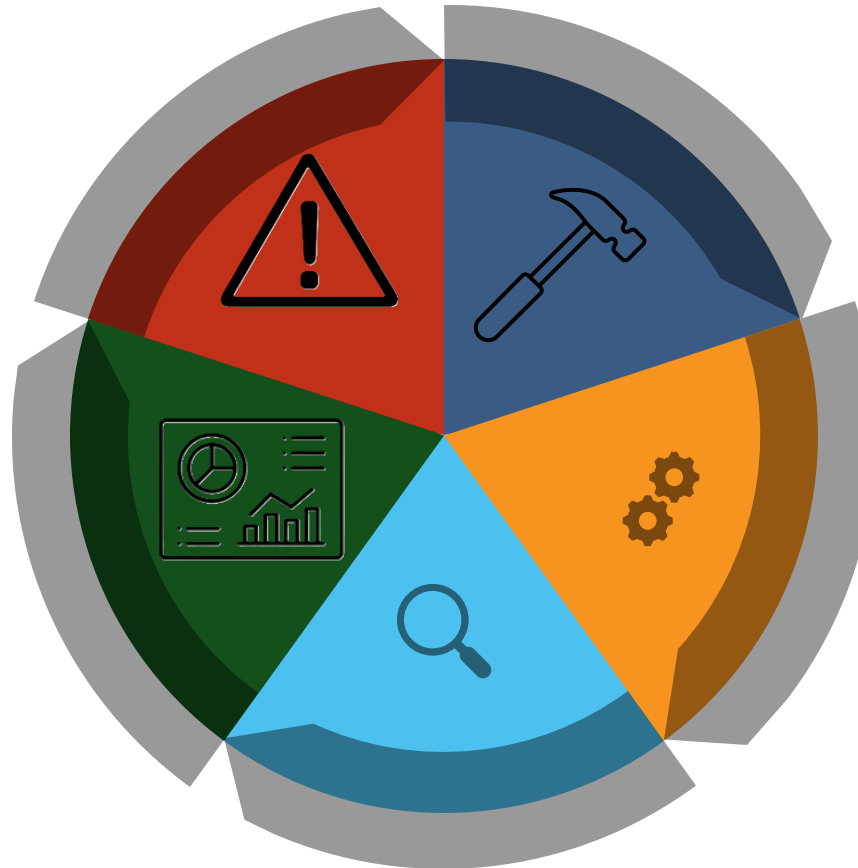

ALDI relies on sales history, not customer level data

## DATA SOURCES

POS Systems  
Supply Chain  
ERP (SAP)

## DASHBOARDS

Store  
Regional  
Category Buyer & Supply Chain Views

## ANALYTIC TOOLS

SAP Analytics Cloud  
SQL-based custom apps

## PROPOSED KPI ENHANCEMENT

Customer Level Metrics  
Promotion Tracking  
Segment based forecasting

# Privacy and GDPR

## Encryption

TLS 13(in transit), AES-256 (at rest)

## Access Control

Role-Based Access and Multi-Factor Authentication

## Consent

Clear, opt-in buttons for marketing and data use.

## Rights

Users can access, correct, and delete their data easily.

## Government

EU-Based data hosting, Data Protection Officer.

# Ethical Considerations

**01**

## **Privacy vs Personalisation**

Collecting purchase data for personalized offers risks on customer privacy despite following GDPR guidelines.

## **Algorithmic Fairness and Bias**

AI-Driven Promotions could unintentionally discriminate or exclude certain customer groups without a transparent design.

**02**

**03**

## **Inclusivity and Digital Divide**

Mobile-only scheme affects non-tech users, creating unequal access to discounts and rewards.

### Key Partnerships

- Private Label Supplier Network
- Payment Processing & Financial Services
- Technology & Cloud Infrastructure Providers
- Data & Analytics Partners

### Key Activities

- Supply Chain & Inventory Management
- Retail Operations & Cost Control
- Data Analytics & Personalised Marketing
- Mobile Platform Development & Management

### Key Resources

- Private Label Product Portfolio
- Efficient Physical Supply Chain & Store Network
- Customer Data & Analytics Platform
- Mobile App & IT Infrastructure

### Value Proposition

- Guaranteed Lowest Prices
- Personalised Savings & Rewards
- Efficient & Streamlined Shopping Experience
- Consistent Quality, Primarily Private Label

### Customer Relationships

- Automated Loyalty and Personalisation
- Efficient Self-Service
- Transactional Transparency
- Community Engagement

### Channels

- Retail Stores
- Mobile App
- Weekly Digital Circulars and Website
- Social Media

### Customer Segments

- Price Driven Families and Households
- Budget Conscious Students and Young Adults
- Time Efficient Shoppers
- Private Label Accepting "Smart Shoppers"

### Cost Structure

- Cost of Goods Sold & Supply Chain Operations
- Physical Store Network & Staffing
- Technology Development & Maintenance
- Data Analytics & Digital Marketing

### Revenue Streams

- Direct Sales of Grocery Products
- Data Driven Supplier Insights & Promotions
- Increased Basket Size & Customer Lifetime Value
- Advertising & Partnership Placements

# Conclusion
